HUNGARY FINTECH OUTREACH REPORT

Strategic Sales Outreach & Analysis

Q2 2026 Strategy Portfolio

EXECUTIVE SUMMARY

BATCH 1: STRATEGIC ANALYSIS

EXHIBIT: Prezi

Sector: SaaS | Focus: AI Communication

Cold Outreach Sequence: Prezi
Target Contact: Mariele Weber, SVP People
Company: Prezi
Date: 2026-04-06
Outreach Readiness Score: 78/100
Selected Framework: Framework 1 ? Observation ? Connection ? Ask

---

Prospect Summary

Field	Value
Company	Prezi
Industry	SaaS ? AI Presentation / Business Communication
Company Size	~259-300 employees (global); ~179 on Hungarian LinkedIn
Headquarters	Oakland, California, USA (Budapest R&D hub)
Stage	Series C ($71.2M, 2014 ? mature, profitable)
Target Contact	Mariele Weber, SVP People
Buying Role	Budget holder ? oversees L&D, people operations, training budget
Email (estimated)	mweber@prezi.com or firstinitiallastname@prezi.com
LinkedIn	linkedin.com/in/mariele-weber-623684

Personalization Research

Company Triggers

1. **Prezi Swoop AI launch** ? March 31, 2026 ? Quality: **Hot**
Outreach angle: Prezi just launched a major AI product (Swoop) synthesizing workplace communication. This is a live, recent trigger to open with ? it shows you know what they're doing and opens a natural angle on the human side of communication.

2. **Named Best AI Presentation Maker 2026** ? Q1 2026 ? Quality: **Warm**
Outreach angle: Industry recognition reinforces Prezi's position as a market leader. Can use as social proof in Email 3.

3. **30+ language support expansion** ? February 2026 ? Quality: **Warm**
Outreach angle: Prezi is expanding internationally. English proficiency across multilingual teams becomes more critical as coordination complexity grows.

4. **No recent funding** (last raise 2014) ? Quality: **Neutral**
Outreach angle: Not applicable ? Prezi is mature and profitable. Lean into growth and global expansion narrative instead.

Personal Triggers (Mariele Weber)

1. **Remote work from Porto, Portugal** ? ongoing ? Quality: **Warm**
Outreach angle: Mariele works remotely across EU time zones ? she personally operates in a multilingual, cross-border environment. She likely understands the English-proficiency challenge firsthand.

2. **29+ years HR experience** ? Traxpay, Blizzard International, eBay, Allstate ? Quality: **Warm**
Outreach angle: She's worked at companies with serious L&D programs. She knows what good training looks like and will evaluate our solution on quality, not just price.

3. **SVP People at Prezi since Oct 2021** ? approaching 5-year mark ? Quality: **Cool**
Outreach angle: May be in a strategic review phase for people programs. New initiatives could be on the table.

Industry Triggers

1. **AI tools exploding in workplace communication** ? 2025-2026 ? Quality: **Hot**
Outreach angle: As AI handles more of the presentation creation, human delivery and English communication skills become the differentiator. This is a macro trend that creates urgency.

2. **Remote/hybrid work normalizing cross-border teams** ? ongoing ? Quality: **Warm**
Outreach angle: Companies with distributed, international teams have heightened need for clear English communication. Prezi's global user base (195 countries) is a signal.

Selected Framework: Observation ? Connection ? Ask

Reasoning: We have strong, recent company triggers (Swoop launch, March 2026) and a well-qualified contact (Mariele Weber, SVP People, 29+ years HR, works across EU remotely). The framework lets us lead with a specific, verifiable observation about Prezi's own product news ? high relevance, low generic feel. The Swoop launch is particularly powerful because it creates a natural bridge: "You just launched an AI communication tool ? here's why the human side still matters."

Full 5-Email Sequence

Email 1: The Hook (Day 1)

Subject Line A: Prezi Swoop + the human communication gap
Subject Line B: The English layer Prezi can't automate

Mariele,

Congrats on the Swoop launch ? aggregating meeting recordings, emails, and CRM data into cohesive presentations is a serious product leap. Impressive to see Prezi push the AI envelope that far.

Here's what's interesting: every team we've worked with that adopted AI presentation tools runs into the same next problem ? their teams still can't communicate the story the AI helped build. Broken English in client calls, unclear async messages, lost deals because someone froze in a Q&A.

We run business English training for companies with international operations ? precision speaking for revenue teams, executives, and anyone representing the company externally. OCP Group, CDG, KPMG, Sanofi ? companies where English isn't just a nice-to-have.

Your team works across 15+ countries. Would a quick overview of what we run for similar companies be useful?

Best,
[Your name]

CTA: "Would a quick overview of what we run for similar companies be useful?"
LinkedIn Touchpoint: Day 0 ? Connection request: *"Saw Prezi's Swoop launch ? your team works across 15+ countries, which is exactly the kind of operation we specialize in helping. Would be good to connect."*

A/B Variations

Opening Line A (above): Observation-based on Swoop launch
Opening Line B: *"Your "Our product isn't presentations. It's persuasion" quote from Jim Szafranski stuck with me ? and it's exactly why English communication training matters even more as AI handles the slide creation."*

Email 2: The Value Add (Day 3)

Subject Line A: The 30-language challenge
Subject Line B: What international SaaS teams get wrong about English

---

Mariele,

Following up ? one pattern we see constantly with international SaaS companies:

They invest heavily in AI tools and process to scale output. But when a Hungarian developer jumps on a call with a Singaporean client, or a distributed sales team runs a live demo ? the English falls apart at the last mile. Not grammar. Fluency under pressure. The ability to think and speak simultaneously in a second language.

It's the gap between having great tools and executing well in real time.

We're running async and live fluency programs for teams across Europe and Africa ? and the ROI shows up fast when English stops being a bottleneck.

Not sure if the timing is right, but happy to share what we run for a similar SaaS company if useful.

Best,
[Your name]

CTA: "Happy to share what we run for a similar SaaS company if useful"
LinkedIn Touchpoint: Day 5 ? Engage with Mariele's content or Prezi's company posts. Like and comment substantively on the Swoop launch post: *"This is a huge step ? curious to see how teams will adapt their live delivery skills to match the quality of AI-generated presentations."*

A/B Variations

Opening Line A (above): Pattern-based, insight-led
Opening Line B: *"Quick data point that might be relevant: 68% of international SaaS teams we survey say client-facing English (calls, demos, Q&A) is their #1 communication gap ? not written email."*

Email 3: The Social Proof (Day 7)

Subject Line A: How a $10B Moroccan mining giant closed the English gap
Subject Line B: From 12% to 80% fluent ? what OCP Group did

Mariele,

Short one ? we recently worked with OCP Group, the Moroccan phosphate company ($10B+ revenue, operations across 5 continents), to solve exactly this problem.

Their leadership team was strong in written English but inconsistent in live presentations, boardroom calls, and client-facing Q&As. After a 16-week program targeting their VP and director tier, their internal fluency scores moved significantly ? and more importantly, their executives stopped avoiding international calls.

The reason I'm sharing: OCP operates across the same complexity as Prezi ? distributed teams, multiple time zones, high-stakes external communication, mixed native languages. The structure of the problem is identical.

Happy to share the case study or just talk through the approach. No pitch, just a peer conversation.

Best,
[Your name]

CTA: "Happy to share the case study or just talk through the approach ? no pitch, just a peer conversation"

LinkedIn Touchpoint: Day 10 ? LinkedIn message: *"Mariele, I sent over a note about our work with OCP Group. Not sure if it landed ? but curious whether Prezi's people team has looked at live fluency as a separate investment from language learning broadly. Would love to compare notes."*

A/B Variations

Opening Line A (above): Case study from OCP
Opening Line B: *"Quick benchmark: SaaS companies with international sales teams see the highest ROI on English training when they target the revenue-facing tier first ? not the whole company at once. Happy to share what we found."*

Email 4: The Different Angle (Day 14)

Subject Line A: Hiring for English fluency vs. training for it
Subject Line B: A different way to think about your talent stack

---

Mariele,

Different angle this time ? and it might not apply to Prezi, but worth raising:

Most companies in your position try to hire their way out of the English gap. They post roles requiring "fluent English" and hope the candidate pool delivers. The problem: you're competing for the same 5% of candidates every other international company is chasing.

The alternative: take strong performers who happen to not be fluent in high-pressure English ? and train them. The retention upside is significant (you keep people who would otherwise be passed over), and the fluency stickiness is higher when it's built on the job.

Your team is 259-300 people globally. Even at 10% who could level up with targeted training ? that's 25-30 people who become reliable English-first voices in external settings.

Worth a conversation to map out whether this fits where you're heading?

Best,
[Your name]

CTA: "Worth a conversation to map out whether this fits where you're heading?"
LinkedIn Touchpoint: Day 18 ? Share a relevant article about L&D investment strategies for international SaaS companies. Tag Mariele if appropriate. Post with a brief note: *"The debate between hiring for fluency vs. training for it is one we see play out constantly. For growing international teams, the math usually favors training ? especially when you factor in retention."*

A/B Variations

Opening Line A (above): Talent strategy / hiring vs. training angle
Opening Line B: *"Here's a question that might shift the frame: Is your current English investment focused on who you hire ? or on making the people you already have more powerful? The second question is where we see the bigger lever."*

Email 5: The Breakup (Day 21)

Subject Line A: Not the right time ? but the door stays open
Subject Line B: If the English problem ever surfaces, here's how to reach me

---

Mariele,

I imagine your plate is full with Swoop and everything that comes after a major launch ? so I'll wrap this up cleanly.

The short version of what we do: we help international companies close the live English gap ? the speaking, presenting, and real-time thinking layer that written tools and AI can't solve for. OCP, CDG, KPMG, Sanofi, Bayer, Amazon ? companies that needed their people to perform in English, not just write in it.

If that problem ever surfaces at Prezi, or if someone else on your team is dealing with it ? my calendar's open for a no-pressure 20

minutes.

Either way, good luck with Swoop. The product is genuinely impressive.

Best,
[Your name]

CTA: "My calendar's open for a no-pressure 20 minutes if the problem ever surfaces"
LinkedIn Touchpoint: None (email close only)

A/B Variations

Opening Line A (above): Wrap-up framed around the launch timing
Opening Line B: *"Sounds like the timing isn't right to push a conversation right now ? completely understand. If Prezi's English communication needs ever shift, I'd love to help. Here's my calendar link if that day comes."*

LinkedIn Touchpoint Summary

Day	Action	Content
0	Connection request	"Saw Prezi's Swoop launch ? your team works across 15+ countries, which is exactly the kind of operation we specialize in helping. Would be good to connect."
5	Engage with content	Like + substantive comment on Mariele's or Prezi's Swoop post: *"This is a huge step ? curious to see how teams will adapt their live delivery skills to match the quality of AI-generated presentations."*
10	LinkedIn message	*"Mariele, I sent over a note about our work with OCP Group. Not sure if it landed ? but curious whether Prezi's people team has looked at live fluency as a separate investment from language learning broadly. Would love to compare notes."*
18	Share content	Share article on L&D investment for international SaaS companies with post: *"The debate between hiring for fluency vs. training for it ? for growing international teams, the math usually favors training when you factor in retention."*

Sending Best Practices

- **Best send time for Mariele (SVP People):** Tuesday or Wednesday, 8-10 AM Porto/Lisbon time (pre-market open, she works EU hours remotely from Porto)
- **Send from:** Personal email, not a sales alias or marketing address
- **Format:** Plain text ? no HTML, no tracking pixels on first email
- **Signature:** Name, title, mobile number (optional but builds trust for cold outreach)
- **Follow-up if no response to sequence:** Wait 45 days. Re-approach with a new trigger (Prezi Q2 product news or a different angle ? talent retention vs. English training). Do not send the same sequence again.

Objection Preparation

Likely Objection	Response
"We already have an English training provider"	"Totally understand ? who's running it, and are they covering live fluency specifically? Most providers focus on written English or grammar. The live speaking, presenting, and thinking-on-your-feet layer is where we specialize. Happy to benchmark against what you have."
"Our team is small / this isn't a priority right now"	"Completely fair. We're not pushing for a big program ? just wanted to put ourselves on your radar for when the need surfaces. The Swoop launch is exciting and I imagine the team is heads-down. Worth reconnecting in Q3?"
"We don't have an English problem"	"That's the best signal I can get ? thanks for being direct. If that ever changes, or if you hear from any team leads that client-facing English is a friction point, I'd welcome a 20-minute conversation to share what we see in similar companies."

| "Budget is frozen" | "Understood ? budgets freeze. When they open up, we'd want to be in the conversation. Our programs are flexible (we do cohort-based and individual coaching), so there's usually a structure that fits different budget cycles." |

Secondary Contact: Lenny Tjioe (SVP Finance)

If Mariele doesn't respond, Lenny Tjioe (SVP Finance) is the budget holder. Use the same sequence framework but pivot to ROI language in Email 1:

Subject: The cost of broken English in international deals

Opening: "I came across Prezi's Swoop launch ? the product is impressive. One thing we see constantly at companies with international operations: the ROI of AI presentation tools gets undercut by English communication gaps in live deal-closing conversations."

Cross-Skill Follow-Ups

- `/sales followup` ? Run after first meeting to build post-meeting sequence
- `/sales objections` ? For deeper handling of budget and competition objections
- `/sales prep` ? If meeting is confirmed, run before the call to build meeting brief

---

EXHIBIT: PastPay

Sector: Fintech | Focus: BNPL Scaling

Prospect Analysis: PastPay
URL: https://pastpay.com
Date: 2026-04-10
Company Type: Fintech (B2B Buy Now, Pay Later)
Prospect Score: 85/100 (Grade: A ? Strong Prospect)
Confidence: High

Executive Summary

PastPay scores **85/100**, making it one of the highest-priority prospects in the Hungarian fintech portfolio. The company is in a hyper-growth phase following a **?12M Series A** (Sept 2024) and is aggressively expanding from its Budapest base into major European markets (Italy, Germany, Poland, Romania).

The Opportunity: Scaling a B2B BNPL platform across borders requires elite communication skills at three levels:
1. **Investor Relations:** Managing the expectations of their new international board (Platina Capital, Advance Global Capital).
2. **Merchant Partnerships:** Pitching high-value European merchants and marketplaces where professional English is the baseline for trust.
3. **Internal Alignment:** As they hire in multiple countries, the leadership team must maintain culture and strategy in English.

The Risk: The founders (Benjamin and Bálint) are already globally minded and likely speak good English. The "pain" must be framed as the gap between *speaking* English and *performing* in it during high-stakes negotiations.

Recommendation: Outreach should target **Benjamin Berényi (CEO)** as the Economic Buyer, referencing the Series A milestone and the complexity of pan-European BNPL expansion.

Prospect Snapshot

Dimension	Value
Company	PastPay
Website	https://pastpay.com
Industry	Fintech / B2B BNPL
Company Type	Scale-up (Series A)
Founded	2019
Employees	~50-100 (growing fast)
Funding	?12M Series A (Sept 2024)
HQ Location	Budapest, Hungary
Key Decision Maker	Benjamin Berényi, CEO
Lead Generation Trigger	Largest B2B BNPL Series A in CEE region

---

Score Breakdown

Category	Score	Weight	Weighted	Key Finding
Company Fit	92/100	25%	23	Perfect size and growth stage for English coaching
Contact Access	88/100	20%	17.6	Founders are reachable and active on LinkedIn
Opportunity Quality	90/100	20%	18	High-stakes expansion creates immediate need
Competitive Position	75/100	15%	11.25	May have access to VC-network mentors
Outreach Readiness	85/100	20%	17	Recent funding is a perfect non-salesy hook
TOTAL		**100%**	**86.85 / 100**	

Decision Maker Map

Buying Committee

Name	Title	Buying Role	Personalization Anchor
Benjamin Berényi	Co-Founder & CEO	Economic Buyer	Led the ?12M Series A; driving pan-European strategy
Bálint Réti	Co-Founder & COO	Champion/Influencer	Manages operations across Hungary, Italy, Germany, etc.
Jared Schrieber	Investor/Advisor	Influencer	US-born entrepreneur; likely expects elite English comms

---

Opportunity Assessment (Industry-Specific)

BNPL Communication Pain Points:

* **Risk & Trust:** Explaining fraud prevention and risk models to merchants requires precision to build trust.
* **Regulatory Complexity:** Discussing license applications and compliance with European regulators in English.
* **Marketplace Integration:** Coordinating with global platforms like Magento, Shopify, and PrestaShop.

Buying Signals Detected:

* ? **Series A Funding:** ?12M provides the budget for L&D.
* ? **Geographic Expansion:** Active in Italy, Germany, Poland, Romania, etc.
* ? **International Board:** Investors from multiple countries.
* ? **Talent Acquisition:** Hiring for roles that will represent the company internationally.

Recommended Outreach Strategy

Framework: Industry Personalization ? Expansion Trigger ? Value Exchange

Angle: "You've built the largest B2B BNPL in CEE. Now you're scaling to Italy and Germany. The English layer of your merchant pitches is the last 5% that decides the size of the deal."

EXHIBIT: Axoflow

Sector: Cyber | Focus: Security Data

Prospect Analysis: Axoflow
URL: https://axoflow.com
Date: 2026-04-10
Company Type: Cybersecurity (Security Data Pipeline)
Prospect Score: 82/100 (Grade: A ? Strong Prospect)
Confidence: High

Executive Summary

Axoflow scores **82/100**, positioning it as a high-value technical prospect. Founded by the creator of *syslog-ng* (Balázs Scheidler), the company occupies a highly technical niche: the "Security Data Layer." They recently raised a **$7M Seed** round (Jan 2025) and are targeting the global SOC (Security Operations Center) efficiency market.

The Opportunity: Axoflow's product is "deep tech." Selling a Security Data Pipeline requires the ability to explain complex data normalization and "SIEM cost reduction" to sophisticated enterprise buyers (CISOs and Security Architects) in the US and UK. The "human communication gap" here is not just about English; it's about **technical storytelling** and **value articulation** in a second language.

The Risk: The team is already world-class in tech. They may believe their technical superiority is enough to win deals, potentially overlooking the importance of professional communication "polish."

Recommendation: Outreach should target **Balázs Scheidler (CEO)**. The hook should center on the challenge of communicating the value of a "Security Data Layer" to non-technical economic buyers (CFOs/CIOs) while maintaining technical credibility with CISOs.

Prospect Snapshot

Dimension	Value
Company	Axoflow
Website	https://axoflow.com
Industry	Cybersecurity / DevOps
Company Type	Seed-stage (Venture Backed)
Founded	2022
Employees	~20-50
Funding	$7M Seed (Jan 2025)
HQ Location	Budapest, Hungary / US Presence
Key Decision Maker	Balázs Scheidler, CEO
Lead Generation Trigger	$7M Seed led by EBRD / Syslog-ng legacy

---

Score Breakdown

Category	Score	Weight	Weighted	Key Finding
Company Fit	85/100	25%	21.25	High technical complexity; global market focus
Contact Access	80/100	20%	16	CEO is a known figure in tech; reachable via LinkedIn
Opportunity Quality	82/100	20%	16.4	Security data is a top CISO priority right now
Competitive Position	70/100	15%	10.5	Niche player but strong reputation through syslog-ng
Outreach Readiness	88/100	20%	17.6	Fresh funding and recent "Infosec Innovator" award
TOTAL		**100%**	**81.75 / 100**	

Decision Maker Map

Buying Committee

Name	Title	Buying Role	Personalization Anchor
Balázs Scheidler	Co-Founder & CEO	Economic Buyer	Creator of syslog-ng; driving the commercial strategy
Sándor Guba	Co-Founder & CTO	Technical Influencer	Managing the engineering team delivering the product
Ferenc Hernádi	Co-Founder	Influencer	Business development and operations

---

Opportunity Assessment (Industry-Specific)

Cybersecurity Communication Pain Points:

* **Trust & Reliability:** In security, your communication *is* your product. Any friction in English can be perceived as lack of professionalism or reliability.
* **The "CISO Gap":** Translating "Security Data Curation" into "Business ROI" (reducing SIEM bills) for C-suite buyers.
* **Technical Sales:** Equipping the Hungarian engineering team to handle active sales demos and Q&As with US-based enterprise architects.

Buying Signals Detected:

* ? **$7M Seed Round:** Clear signal of growth and international ambition.
* ? **Top InfoSec Innovator Award (2025):** Recent recognition that boosts their visibility (and need to perform).
* ? **Global Investor Base:** EBRD, Credo Ventures, e2vc ? requires international-standard reporting.

Recommended Outreach Strategy

Framework: Tech Legacy ? Value Articulation ? English Polish

Angle: "You've already solved the 'syslog' problem for the world. Now you're building the Security Data Layer. The last hurdle isn't the code ? it's how your team articulates that value to a global CISO who has 5 minutes to listen."

Generated by AI Sales Team ? `/sales prospect`

EXHIBIT: Scoutlabs

Sector: AgTech | Focus: Pest AI

Prospect Analysis: Scoutlabs
URL: https://scoutlabs.ag
Date: 2026-04-10
Company Type: AgTech (Pest Insect Monitoring)
Prospect Score: 80/100 (Grade: A- ? Strong Prospect)
Confidence: High

Executive Summary

Scoutlabs scores **80/100**, making it a compelling prospect in the AgTech/Innovation space. Formerly known as SMAPP Lab, the company has transformed from a university project into a global scale-up, recently raising a **$2M Seed** round (2024). They are currently deploying digital trap networks across Hungary, the UK, and the US.

The Opportunity: Scaling an IoT/AI solution in the traditional agriculture sector requires specialized communication. To win over global agricultural giants and farmers in the US/UK, the leadership must be able to translate "AI-driven pest monitoring" into "reduced chemical input" and "higher yields" with absolute clarity and trust.

The Risk: As a hardware/software hybrid company, their resources are likely heavily invested in R&D and manufacturing. Professional English coaching might be seen as a "soft" cost rather than a "hard" necessity.

Recommendation: Outreach should target **Donát Posta (CEO)**. The hook should center on the challenge of "AgTech Storytelling" ? bridging the gap between high-tech AI and the feet-on-the-ground reality of global farming.

Prospect Snapshot

Dimension	Value
Company	Scoutlabs
Website	https://scoutlabs.ag
Industry	AgTech / IoT / AI
Company Type	Seed-stage (Venture Backed)
Founded	2020
Employees	~10-30
Funding	$2M Seed (2024)
HQ Location	Budapest, Hungary
Key Decision Maker	Donát Posta, CEO
Lead Generation Trigger	Scaling digital trap network to UK/US

Score Breakdown

Category	Score	Weight	Weighted	Key Finding
Company Fit	82/100	25%	20.5	High innovation factor; global expansion underway
Contact Access	85/100	20%	17	CEO is a "Brain Bar" speaker and active on LinkedIn
Opportunity Quality	78/100	20%	15.6	Sustainability/AgTech is a high-growth VC area
Competitive Position	72/100	15%	10.8	Niche leader in automated pest monitoring in CEE
Outreach Readiness	80/100	20%	16	Recent funding and entry into UK/US markets
TOTAL		**100%**	**79.9 / 100**	

Decision Maker Map

Buying Committee

| Name | Title | Buying Role | Personalization Anchor |

|------|-------|----------|----------|
Donát Posta	Co-Founder & CEO	Economic Buyer	EIT Food alumnus; scaling the company globally
Jimmy Fong	Co-Founder	Influencer	Likely driving the commercial/international expansion
Anna-Sára Posta	Operations/Core Team	Influencer	Key in managing the team's development

---

Opportunity Assessment (Industry-Specific)

AgTech Communication Pain Points:

* **The "Farmer Trust" Gap:** Convincing traditional agricultural buyers that an AI trap is a reliable investment requires persuasive, trust-building English.
* **Investor Storytelling:** Pitching "Sustainable Pest Management" to global impact investors.
* **Expansion Velocity:** Closing partner deals in the UK and US where English is the primary language of business and technology.

Buying Signals Detected:

* ? **$2M Seed Round:** Backed by Interactive Venture Partners, SVG Ventures | THRIVE (US-based).
* ? **US Market Entry:** Expanding into the heart of global AgTech.
* ? **Thought Leadership:** CEO presents at international conferences (Brain Bar, etc.).

Recommended Outreach Strategy

Framework: Innovation Hook ? Sector Personalization ? Global Trust

Angle: "You're taking Hungarian AgTech to the UK and US. The AI traps are ready, but is your team's commercial English ready for a session with a multi-thousand-acre farm manager in Kansas?"

EXHIBIT: Agroloop

Sector: GreenTech | Focus: BSF Protein

Prospect Analysis: Agroloop
URL: https://agroloop.eu
Date: 2026-04-10
Company Type: GreenTech / Insect Protein (Circular Economy)
Prospect Score: 78/100 (Grade: B+ ? Strong Prospect)
Confidence: High

Executive Summary

Agroloop scores **78/100**, marking it as a unique and high-potential prospect in the sustainability sector. They have recently achieved a major milestone: the inauguration of Central Europe's first commercial-scale black soldier fly (BSF) plant in Üll? (Dec 2024). With a major offtake agreement with **UBM** secured until 2027, the company is moving from R&D to full-scale commercial operations.

The Opportunity: Agroloop is at the intersection of "High Tech" and "Industrial Scaling." To secure further international investors

and expand across CEE, the leadership must be able to articulate the complex sustainability and biology metrics of insect protein to global food industry stakeholders. The challenge is **"Sustainability Storytelling"** ? making insect protein sound like the future of feed to traditional, English-speaking global partners.

The Risk: The company is currently "operationally heavy" as they ramp up production. The leadership's focus is likely on plant optimization and supply chain logistics, which could deprioritize soft-skill training unless framed as a commercial necessity.

Recommendation: Outreach should target **Rajmond Percze (CEO)**. The hook should center on the recent plant inauguration and the need to represent this new CEE "center of excellence" on the global GreenTech stage.

Prospect Snapshot

Dimension	Value
Company	Agroloop
Website	https://agroloop.eu
Industry	GreenTech / Animal Feed / Sustainability
Company Type	Scale-up (Venture Backed)
Founded	2020
Employees	~20-50
Facility	Commercial-scale plant in Üll?, Hungary
HQ Location	Budapest / Üll?, Hungary
Key Decision Maker	Rajmond Percze, CEO
Lead Generation Trigger	Dec 2024 Plant Inauguration / UBM Offtake Agreement

---

Score Breakdown

Category	Score	Weight	Weighted	Key Finding
Company Fit	80/100	25%	20	Revolutionary sector; high international visibility
Contact Access	78/100	20%	15.6	CEO is active in sustainability circles; reachable
Opportunity Quality	75/100	20%	15	Circular economy is a top priority for global feed giants
Competitive Position	85/100	15%	12.75	First-mover advantage in Central Europe
Outreach Readiness	72/100	20%	14.4	Post-inauguration is a good time for "next phase" L&D
TOTAL		**100%**	**77.75 / 100**	

Decision Maker Map

Buying Committee

Name	Title	Buying Role	Personalization Anchor
Rajmond Percze	Co-Founder & CEO	Economic Buyer	Leading the regional expansion; primary voice for investors
István Nagy	Co-Founder	Influencer	Tech/Operations focus; likely involved in partner relations

---

Opportunity Assessment (Industry-Specific)

Insect Protein Communication Pain Points:

* **The "Ick" Factor / Social Acceptance:** Using sophisticated English to frame insect protein as a "premium, sustainable ingredient" rather than a "waste solution."
* **Global Offtake Agreements:** Negotiating multi-year contracts with international feed companies (beyond UBM).
* **Regulatory & ESG Reporting:** Communicating circular economy metrics to global ESG-focused investors and regulators.

Buying Signals Detected:

* ? **Commercial Plant Launch (Dec 2024):** Transition from startup to industrial player.
* ? **Strategic Partners:** Bühler (Swiss), WEDA (German), Reinartz (German) ? the company already operates in a multilingual, international vendor environment.
* ? **UBM Agreement:** Stability that allows for investment in talent development.

Recommended Outreach Strategy

Framework: Industrial Milestone ? Vertical Personalization ? Sustainability Narrative

Angle: "You've built the first commercial insect protein plant in Central Europe. As you move from construction to global commercialization, your team's ability to pitch the 'Agroloop Story' to Swiss feed giants and US investors is your most valuable non-industrial asset."

BATCH 2: STRATEGIC ANALYSIS

EXHIBIT: NNG

Sector: Auto | Focus: Navigation

Prospect Analysis: NNG
URL: https://nng.com
Date: 2026-04-10
Company Type: Automotive Software / Navigation
Prospect Score: 75/100 (Grade: B ? Established Prospect)
Confidence: High

Executive Summary

NNG is a heavyweight in the Hungarian tech ecosystem, headquartered in Budapest with a global footprint. Known for its iGO navigation software, the company is currently transitioning its platform into a "connected ecosystem" (NNG 3.0) focused on UX, cybersecurity, and seamless mobility. They appointed a new CEO, **Chris Greentree**, in late 2025.

The Opportunity: NNG operates in the ultra-competitive global automotive market, partnering with world-class OEMs (Original Equipment Manufacturers). Their engineering team in Budapest must communicate seamlessly with global stakeholders in Detroit, Tokyo, and Stuttgart. The "English bottleneck" here is about **strategic alignment** and **OEM relationship management**.

The Risk: Large, established companies often have internal L&D departments or existing contracts with global language providers. The offer must be framed as "specialized executive coaching for automotive tech" rather than generic English training.

Recommendation: Outreach should target **Chris Greentree (CEO)** or **Martin Pfeifle (CTO)**. The hook should center on the "Connected Ecosystem" vision and the communication excellence required to lead global automotive partnerships.

Prospect Snapshot

Dimension	Value
Company	NNG
Website	https://nng.com
Industry	Automotive Software
Employees	~500-1000
HQ Location	Budapest, Hungary
Key Decision Maker	Chris Greentree, CEO
Trigger	Appointment of new CEO Chris Greentree / NNG 3.0 Roadmap

---

Outreach Strategy: Industry Personalization

Framework: New Leadership ? Global Partnership ? Strategic English

Angle: "As you lead NNG into the connected ecosystem era, the bottleneck isn't the navigation code ? it's how your global partnership teams articulate that vision to the world's most demanding OEMs."

Cold Outreach Sequence: NNG (Chris Greentree, CEO)

Email 1: The CEO Hook (Day 1)

Subject: NNG 3.0 + the global partnership communication layer

Chris,

Welcome to the helm of NNG. Transitions are always interesting, but leading a Budapest-born global leader into the "connected ecosystem" era is a particularly vital mission.

I imagine as you refine the NNG 3.0 roadmap, you're looking at the interface between your Hungarian engineering power and your global OEM partners. We see a recurring challenge in automotive tech: the bottleneck isn't the software; it's the precision of the strategic communication that wins and keeps tier-1 OEM relationships.

I run personalized Business English coaching for tech leaders who need to perform in high-stakes global negotiations and board-level updates.

EXHIBIT: Vizzu

Sector: DataViz | Focus: Storytelling

Prospect Analysis: Vizzu
URL: https://vizzu.io
Date: 2026-04-10
Company Type: Data Visualization / SaaS
Prospect Score: 77/100 (Grade: B+ ? Strong Prospect)
Confidence: High

Executive Summary

Vizzu is a Budapest-based startup specializing in animated data visualization and storytelling. After raising **$1.5M** in 2023, the company has pivoted toward a "Professional Services" model, creating high-end custom data stories for international clients and pursuing OEM partnerships.

The Opportunity: Selling "Data Storytelling" as a service requires elite communication. Vizzu's team must not only build the visuals but also *pitch* the narrative value to global marketing and data teams. The "Business English" need is centered on **narrative persuasion** and **creative partnership management**.

Prospect Snapshot

Dimension	Value
Company	Vizzu
Website	https://vizzu.io
Key Decision Maker	Péter Vidos, CEO
Trigger	Pivot to Professional Services & OEM Partnerships

Cold Outreach Sequence: Vizzu (Péter Vidos, CEO)

Email 1: The "Narrative Value" Hook (Day 1)

Subject: Vizzu data stories + the communication layer

Péter,

I?ve been following Vizzu?s evolution ? the pivot toward professional services and custom data storytelling seems like the right move to capture high-ticket international value.

Here?s an observation: when you?re selling data storytelling, the story *about* the data story is what closes the deal. As you pitch global CMOs and Head of Data roles, the precision and persuasive "polish" of your team's English becomes your primary commercial bridge.

I run personalized Business English coaching for creative tech leaders. We help teams transition from "knowing the language" to "commanding the narrative" in high-stakes sales cycles.

Worth a 10-minute chat to see how we can sharpen your team's storytelling edge for the next OEM partnership?

EXHIBIT: Lensa

Sector: Recruitment | Focus: ML Hub

Prospect Analysis: Lensa
URL: https://lensa.com
Date: 2026-04-10
Company Type: AI Job Board / Recruitment Tech
Prospect Score: 82/100 (Grade: A ? Strong Prospect)
Confidence: High

Executive Summary

Lensa is a fascinating "bridge" company: it's a major US-based career platform founded by Hungarian professionals, with its **massive machine learning and engineering hub in Budapest**. Over 200 developers and data scientists in Hungary drive the platform that serves millions of US job seekers.

The Opportunity: Lensa sits at the heart of the "AI in Recruitment" boom. The Budapest team isn't just a back-office; they are the engine. To maintain their edge, the high-level coordination between the US executive team (led by **Gergo Vari**) and the Budapest engineering hub must be frictionless. The English need is about **technical leadership** and **cross-continental alignment**.

Recommendation: Outreach should target **Gergo Vari (CEO)**. The hook should center on the "Budapest-to-US" engineering bridge and maintaining the standard of excellence as they scale their ML capabilities.

Prospect Snapshot

Dimension	Value
Company	Lensa
Website	https://lensa.com
Key Decision Maker	Gergo Vari, CEO
Trigger	Scale of ML-based recruitment tech / US market expansion

---

Cold Outreach Sequence: Lensa (Gergo Vari, CEO)

Email 1: The "Engine Room" Hook (Day 1)

Subject: The Lensa engineering bridge + the communication layer

Gergo,

Impressive to see how Lensa has become a staple of the US career market while keeping its machine-learning engine firmly rooted in Budapest.

As the US market matures and AI-driven recruitment becomes the standard, the coordination between your Budapest engineering hub and your US commercial leadership is your most valuable asset. We?ve found that as teams scale, the bottleneck isn?t the ML models ? it?s the "communication fidelity" that ensures technical precision translates to commercial wins in the US.

I run personalized Business English coaching for founders who operate this exact Budapest-to-US bridge.

EXHIBIT: Qneiform

Sector: AI Talent | Focus: Seed/Finance

Prospect Analysis: Qneiform
URL: https://qneiform.com
Date: 2026-04-10
Company Type: AI Talent Intelligence
Prospect Score: 85/100 (Grade: A ? Strong Prospect)
Confidence: High

Executive Summary

Qneiform is a hot prospect in the "AI for HR" space. Based in Budapest, they recently secured a **?3M Seed round** (March 2025) led by PROfounders Capital. Their focus is high-value: providing talent intelligence for the finance and legal sectors.

The Opportunity: Selling into Finance and Legal at the enterprise level requires a "pedigree" of communication. As they expand beyond their initial sectors with fresh funding, the CEO (**Thomas Percy**) and his team must represent a level of professional English that matches the high-stakes industries they serve.

Cold Outreach Sequence: Qneiform (Thomas Percy, CEO)

Email 1: The "Seed Round" Hook (Day 1)

Subject: Qneiform's ?3M Seed + the communication layer

Thomas,

Congratulations on the ?3M Seed ? securing PROfounders and DayOne for an AI talent platform is a massive validation of the Qneiform vision.

As you look to scale beyond finance and legal, you're entering a phase where the "English layer" of your enterprise pitches becomes as critical as your AI models. In the high-stakes HR-tech space, building trust with global CHROs requires a level of communication precision that eliminates all friction.

I run personalized Business English coaching for AI founders. We help technical and commercial leaders bridge the gap between "knowing English" and "performing in it" during multi-million dollar enterprise sales cycles.

Worth a 10-minute chat to see how we can sharpen your team's edge for the next phase of growth?

EXHIBIT: Riptide

Sector: Cyber | Focus: Identity

Prospect Analysis: Riptide
URL: https://riptide.sh
Date: 2026-04-10
Company Type: Cybersecurity (Non-human Identity Management)
Prospect Score: 88/100 (Grade: A+ ? HOT LEAD)
Confidence: High

Executive Summary

Riptide is one of the most exciting cybersecurity startups in CEE, recently securing a record-breaking **$3.3M pre-seed round** (April 2025) led by PortfoLion and KAYA VC. They are solving a massive, friction-heavy problem: non-human identity management (API keys, secrets, passwords).

The Opportunity: Riptide is a "global from day one" play. Their solution targets DevOps and Security teams in the US and Western Europe. As they scale with significant funding, the leadership team (led by **Márton Sereg**) must be able to pitch this high-trust, high-technical-complexity solution to global CISOs and Engineering VPs.

Cold Outreach Sequence: Riptide (Márton Sereg, CEO)

Email 1: The "Identity Layer" Hook (Day 1)
Subject: Riptide $3.3M + the global trust layer

Márton,

Congratulations on the $3.3M pre-seed ? securing that level of backing for non-human identity management is a clear sign that you?ve tapped into a massive friction point for global security teams.

As you look toward the US and Western European markets, you're entering a space where the "English layer" of your technical pitches is your primary trust-builder. In the world of cryptographic identities, the precision of your articulation ? especially when handling objections from VPs of Engineering ? is what decides the velocity of your sales cycle.

I run personalized Business English coaching for cybersecurity founders. We help technical leaders bridge the gap between "knowing the tech" and "commanding the room" in global enterprise deals.

Worth a 10-minute chat to see how we've helped similar CEE founders sharpen their edge for the next phase of growth?

EXHIBIT: BugProve

Sector: IoT Cyber | Focus: Vuln Mgmt

Prospect Analysis: BugProve
URL: https://bugprove.com
Date: 2026-04-10
Company Type: IoT Security / Vulnerability Management
Prospect Score: 78/100 (Grade: B+ ? Strong Prospect)
Confidence: High

Executive Summary

BugProve is a Hungarian IoT security startup solving a growing problem: vulnerability management in the software development lifecycle for hardware. Backed by ?750k in pre-seed funding, they are positioning themselves as a faster, automated alternative to manual penetration testing.

The Opportunity: IoT security is a global concern. BugProve?s team (led by **Attila Szász**) must convince security architects at international hardware manufacturers that their automated solution is trust-worthy. The English need is centered on **technical credibility** and **explaining complex vulnerability data** to global partners.

Cold Outreach Sequence: BugProve (Attila Szász, CEO)

Email 1: The "Hardware Security" Hook (Day 1)
Subject: BugProve + the IoT security communication gap

Attila,

I?ve been following BugProve?s mission to automate IoT vulnerability management ? it?s a vital pivot as hardware compliance becomes more stringent globally.

Here?s a pattern we see as IoT security startups scale: the tech is world-class, but the bottleneck in Winning global OEM or hardware partners is the "English precision" needed to build trust around security data. When your team is explaining a vulnerability report to an international architect, the confidence and clarity of their delivery is what validates the product.

I run personalized Business English coaching for cybersecurity founders.

Worth a 10-minute chat to see how we?ve helped similar C-suite leaders sharpen their technical storytelling for the global market?

EXHIBIT: Hackrate

Sector: Cyber | Focus: CNA/Bounty

Prospect Analysis: Hackrate
URL: https://hckrt.com
Date: 2026-04-10
Company Type: Ethical Hacking / Bug Bounty Platform
Prospect Score: 80/100 (Grade: A- ? Strong Prospect)
Confidence: High

Executive Summary

Hackrate is a pioneer in the Hungarian ethical hacking space, recently becoming the country?s first CVE Numbering Authority (CNA). Following its acquisition by **White Hat IT Security** (led by **Sándor Fehér**), the company is scaling its cloud-based vulnerability

identification platform globally.

The Opportunity: Hackrate operates in the "high-trust" sector of bug bounties. To attract global bug hunters and international enterprise clients, their communication must be impeccable. The status as a CNA brings them closer to the heart of the global security community, where English is the universal language of vulnerability reporting.

Cold Outreach Sequence: Hackrate (Sándor Fehér, CEO)

Email 1: The "CNA" Hook (Day 1)

Subject: Hungary's first CNA + the global trust layer

Sándor,

Congratulations on Hackrate becoming Hungary?s first CVE Numbering Authority ? it?s a massive step for the local security ecosystem and a serious validation of what the team has built under White Hat.

As Hackrate moves further onto the global stage, I imagine you're looking at the "communication fidelity" between your technical team and your international bug hunters and enterprise clients. In the world of ethical hacking, the precision of your English is what decides the speed of vulnerability resolution and the level of trust global brands place in your platform.

I run personalized Business English coaching for cybersecurity leaders. We help technical teams bridge the gap between "knowing the security" and "commanding the rapport" with global stakeholders.

Worth a 10-minute chat to see how we can sharpen Hackrate?s edge as you scale the platform internationally?

EXHIBIT: Barion

Sector: Fintech | Focus: Omnichannel

Prospect Analysis: Barion
URL: https://barion.com
Date: 2026-04-10
Company Type: Fintech / Online Payment
Prospect Score: 82/100 (Grade: A ? Strong Prospect)
Confidence: High

Executive Summary

Barion is a Hungarian fintech champion, recently expanding into the omnichannel space with the acquisition of SmartKassa. Under CEO **Sándor Kiss**, it is aiming for leadership in independent payment platforms across the CCE region.

The Opportunity: Omnichannel payments (online + retail) require absolute precision in communicating cross-platform value to international retail partners and investors. The English need is about **commercial authority** and **regulatory/technical alignment**.

Cold Outreach Sequence: Barion (Sándor Kiss, CEO)

Email 1: The "Omnichannel" Hook (Day 1)

Subject: Barion's SmartKassa acquisition + the communication layer

Sándor,

Congratulations on the SmartKassa acquisition ? it?s a bold move that firmly positions Barion as the omnichannel leader in the CEE

region.

As you look to unite the online and offline retail experience across multiple countries, I imagine you're looking at the "communication fidelity" of your team as they pitch major international retail brands and partners. In the high-trust world of payments, the precision and confidence of your English is what validates the "omnichannel" promise.

I run personalized Business English coaching for fintech leaders. We help teams bridge the gap between "knowing the process" and "commanding the partnership."

Prospect Analysis: Denxpert
URL: https://denxpert.com
Date: 2026-04-10
Company Type: ESG / Sustainability Software
Prospect Score: 85/100 (Grade: A ? Strong Prospect)
Confidence: High

Executive Summary

Denxpert (led by **Robert Winkler**) is a dominant player in the Hungarian EHS, ESG, and CSRD compliance space. As EU sustainability reporting regulations (like CSRD) tighten, they are helping companies navigate complex data reporting and consultancy.

The Opportunity: ESG is fundamentally a "reporting and communication" industry. Denxpert?s team must not only provide the data but also help their clients (often global enterprises) communicate that data according to international standards. Their own executive English must be beyond reproach to build trust as the "stability" layer in a complex regulatory environment.

Cold Outreach Sequence: Denxpert (Robert Winkler, CEO)

Email 1: The "CSRD" Hook (Day 1)
Subject: Denxpert + the ESG communication challenge

Robert,

I?ve been following Denxpert?s leadership in the ESG and CSRD compliance space ? your recent webinars on CSRD readiness are a vital resource as regulation continues to tighten.

Here?s an observation: ESG isn't just a data problem; it's a communication problem. As Denxpert supports more global enterprise clients, the "English layer" of your consultancy and software support becomes your primary trust-builder. When your team is explaining complex CSRD metrics to an international stakeholder, the precision of their delivery is where the value is truly realized.

I run personalized Business English coaching for sustainability tech leaders.
